

File Attachments

Ready to use file attachment component for all business apps.

BUSINESS SITUATION

Collaborative workspace application environments, document management applications usually require file attachments functionality. Users need to upload files in multiples, with appropriate categorizations of the files attached.

Any application that requires an attachments option requires the below features.

- Option for attaching multiple documents
- Option to categorize attachments based on nature or purpose of document
- Option to track user role information of the person uploading
- Progress bar for file upload process.

But there are no readily available attachment components that can be leveraged to meet such requirements.

SOLUTION

PositiveEdge Attachments component offers below features:

- Configurable attachment category data source
- Capturing User role
- Configurable Attachment files types- Like.doc, .xls, .ppt, .jpg...etc.
- Structured format of document library with each document mapped to a unique correlation ID

The solution is in a form of user control. This solution can be used in SharePoint and as well as in .net application

HIGHLIGHTS

- Configurable category dropdown to the users for selecting which type of category the documents belongs to.
- Configurable MIME types or File types that can be attached.

Attachments have a correlation ID which tracks the file back to a unique Id (request) and the role of the logged in user

PREREQUISITES

- Uses file system for .Net apps to store files
- Uses flash for uploading multiple documents

ADAPTABILITY

- Can be used in .Net with version 2.0 and above
- Can be used in SharePoint application with version 3.5.
- Provider model is based on standard software patterns and enables faster adoption

BENEFITS

- Ability to upload multiple files
- Seamless integration with .Net applications
- Plugs in to any application across Microsoft technologies.
- Eliminates the time and effort for implementing File attachments features in any business App.

Highlights:

- ✓ Plug and Play
- ✓ Configurable File categories and types
- ✓ Seamless Integration

Technology

- ✓ Microsoft .NET 2.0 and above
- ✓ SQL Server 2008 data source
- ✓ SharePoint 2010

Upcoming Features:

- ✓ Support for Notification
- ✓ Client Script Support
- ✓ Drag and drop option
