

Notifications

Plug and play template driven notification system for any business App.

BUSINESS SITUATION

Most of the applications require notification to be sent to specified users based on user action or an event. To meet such requirement the software developer needs to build the email format, subject and body as per the application needs. These situations often increase the software development time keeping in view the additional factor of admin users having no provision to customize the template of the notification body if any change is required.

SOLUTION

PositiveEdge Notification component is a pluggable solution for notification requirements of various applications. This solution offers below features.

- Business Scenario based notifications
- Emails are template driven
- Uses different email template based upon type of action or event
- Allows users to embed rich text to email body.
- Allows users to send bulk emails.

HIGHLIGHTS

- Business notification data will be embedded in email using smart parsing of templates
- Extensible to support any template data source using provider model
- Supports SQL Server and SharePoint data sources by default
- Driven by standard .Net configuration

ADAPTABILITY

- Can be used in .Net with version 2.0 and above
- Can be used in SharePoint application with version 3.5.
- Template data source is based on provider model
- Provider model is based on standard software patterns and enables faster adoption

BENEFITS

- Business customizable email templates
- Seamless integration with .Net applications
- Plugs in to any application across Microsoft technologies.
- Eliminates the time and effort for implementing notifications in any business App.

Highlights:

- ✓ Plug and Play
- ✓ Configurable Templates driven
- ✓ Scenario based
- ✓ Seamless Integration

Technology

- ✓ Microsoft .NET 2.0 and above
- ✓ SQL Server 2008 data source
- ✓ SharePoint 2010 data source

Reference Adoptions:

- ✓ DIB/HRMPP
- ✓ PET Timesheet

Upcoming Features:

- ✓ Pro Framework Optimizations
- ✓ Support for Attachments
- ✓ Multilingual Templates
- ✓ Multiple Template Formats (JSON, XML)
- ✓ Client Script Support
